

## Combo Lift - PROTOTYPE (Part No. TL10050)

The Trilift<sup>®</sup> Combo Lift is specifically designed as a multi-purpose person lift and component handling trolley. With dual hoist capability the Trilift<sup>®</sup> Combo Lift is designed for the installation & removal of components on Kress Haulers.

Available Trilift<sup>®</sup> Jigs suited for the Trilift<sup>®</sup> Combo Lift include:

**Wiffle Tree Jig (Part No. TL10051).** The Wiffle Tree Jig is designed to handle the wiffle tree steering component safely and efficiently during installation and removal.

**Steering/Accumulator Jig (Part No. TL10052).** The Steering / Accumulator Jig is designed to handle the steering cylinders and accumulators on Kress long haul trucks during installation and removal.

**Steering Arm Jig (Part No. TL10053).** The Steering Arm Jig is designed to handle steering arm linkages on Kress long haul trucks during installation and removal.

### Features

- 2 power options available: pneumatic or diesel
- Suitable for handling accumulators, steering cylinders, steering linkages, towing lugs, steering brackets and more (Kress Trucks)
- Working load limit of 400kgs/882lbs (with personnel)
- Work platform height to 1500mm with hoist table to an additional 1100mm
