

Milbrotec® Yards

The innovative interlocking design of the Milbrotec® Yards improves safety for your cattle, sheep and other stock by removing sharp edges and pinch points. These yards will assist with compliance to the guidelines.

To assemble you simply slot the yard panels together and insert a specially designed locking spike.

No sharp edges or pinch points

Milbrotec® Electric Tree Guard

To stop your livestock eating trees or damaging traditional tree guards, Milbrotec® have created the Electric Tree Guard system. Simply hook the Milbrotec® Electric Tree Guard to an existing hot wire or solar powered source to electrify.

Research and development leading to innovative solutions to increase safety and efficiency for modern day farming
